Råne river valley contributes to Boden's development

Mats Berg

Age 60 years

Lives in Erikslund

Background

Municipal manager i Piteå and Boden

Family

Wife and three children

Current with

Head of Business and responsible for The social change

Sweden has winter in terms of growth, but growth is flourishing in Boden. This condition applies to the highest degree in the Råne river valley.

As born and raised in the central parts of Boden, I honestly haven't had a lot of knowledge about the Sörbyn and Gunnarsby area. It has extended to football games a few times a year.

Since I started working as municipal manager in Boden in the winter of 2015, I have gained a deeper knowledge and insight into the conditions and opportunities in the Råne älvdal through, for me, a very rewarding collaboration and many visits. But also about the incredibly important role the hospitality industry has played and plays for rural development.

I would like to say that the development journey we in Boden are on, to a large extent, began about 15 - 20 years ago when the hospitality industry, through driven entrepreneurs with commitment and structured cooperation, began to create growth and faith in the future in Boden.

This led to increased attractiveness for Boden in general and the countryside in particular. Not least in Råne älvdal, the hospitality industry entrepreneurs have driven the development in the entire area and, together with the committed local population, have created pride and attraction. I also think that what started as a hospitality business in the Råne river valley has grown and become a community builder in its very best form; deve-

lopment with man and nature at the centre, which brings pride, self-esteem and self-confidence.

In the work of attracting people to Boden, but above all in the work of getting those who come here to live and work, to become real Bodenese, we have a lot to learn from what has been built up in the Råne river valley - a journey that only can start with each of us.

Being in Gunnarsbyn/Sörbyn, regardless of whether it is about meetings regarding cooperation agreements with Råek, development projects with entrepreneurs, housing projects, participation in a conference, or simply just going there with the family to have coffee, you are met by fantastic hospitality. This is something that seems to come naturally, that is in the village's DNA.

In the ongoing collaboration with Råek and entrepreneurs from the area, I am met with strong competence, drive, entrepreneurial spirit, joy - and not least a solution-focused approach to various issues, where we find solutions together. This makes it very enjoyable to work with development issues for Råne river valley's continued development - you are happy.

My closing words will be that the people of Råne älvdal have largely contributed to the fantastic situation Boden is in right now - and will contribute to building the long-term society in all of Boden.

We wish you all a nice summer!

Release plan 4 times per year (spring, summer, autumn, winter)

Distributed to residents in the villages around Gunnarsbyn and Niemisel and sent to other members in Råek. Also available at Gunnarsby Lanthandel, Niemisels Livs and Råneå Medborgarkontor

If you live in Råne älvdal or are a member of Råek but do not receive this magazine - get in touch!

The Chairman has the floor

Summer, the long-awaited season, is here, and Just Nu comes out with the summer issue. Råek has invited to the annual general meeting on 25 May. The hospitality industry day "Good hospitality" and the forestry seminar has been completed.

Vattenfall has called for a consultation on planning a wind farm, Storlandet and Råek has left in a referral response.

Bodens rural council has been transformed into a municipal council, and from our area we have two regular members, Bertil Degerlund and the undersigned, two deputies Mogens Amstrup Jacobsen and Anki Granström and Jenny Engström in her role as Råek's operations manager.

The Solar electricity group is working on its mission, and information will be sent to the members partly at the annual general meeting and probably in the autumn issue of Just Nu.

With regards of a pleasant summer
Ingrid Stridfeldt

Psst...

Combine utility with pleasure! Both the recycling center and the secondhand shop are open on Saturdays

ÄLVSKOLAN

During the spring, the school was lucky enough to see how it goes when you prepare a hot air balloon for flight. It was exciting and educational.

In March, the school had an outdoor day in Storclinten. We are happy that we had the opportunity to invite guardians and this year many people came along. Despite cold winds, the food tasted as always, a little tastier outdoors.

GUNNARSBYNS FÖRSKOLA

"The children must be given the conditions to develop a versatile movement ability by being given the opportunity to participate in physical activities and stay in different natural environments"

KVARNÅ FÖRSKOLA

Last winter, the children found a treasure chest inside the preschool. Together, they have thought about who might have left it there and how we can get hold of the code to be able to open the code lock.

As the end of the spring term's project, we have now started an adventure because we received a letter from the Fairy troll. The Fairy Troll has forgotten the code to the treasure chest and reluctantly needs our help to cope with various tasks that lead to the numerical code.

These missions require cooperation, so the Fairy Troll has tried to carry them out himself without success. By reading the missions and following the treasure map, we must show the Fairy Troll that together we can do everything!

OUT ON NEW ADVENTURES WITH ELECTRIC BIKE

Fancy looking around in the Råne river valley and feeling the wind against your cheek? Perfect, because Niemisel's interest association has purchased two electric bicycles that will be available for rent at Niemisel's livs.

We have given them the names Elsy and Elof and they are each equipped with a battery that will take you 50-70 km on one charge. After that, you must rely on your own leg strength. You pay SEK 50 per day and bicycle in rent. So take the opportunity to book yourself on a tour!

OPEN HAIR SALON IN NORRIÄN

Yvonne Kaman and her husband Sietse emigrated from the Netherlands to Sweden in September 2022 and have now settled in Norriän. Yvonne has worked as a professional all-round hairdresser for 26 years. From 2020 until they moved, she also had her own hairdressing salon.

Now they have built a beautiful cozy hairdressing salon in their house. A salon that contains everything a professional hairdresser needs and is aimed at both women, men and children.

- I cut short, medium and long hair, but also all possible different hair types. I take time for my clients because hair is not just hair but also gives a good feeling, says Yvonne.

CITIZEN DIALOGUES WITH THE VILLAGE ASSOCIATIONS

TEXT och PHOTO *Tanja Nilsson, Landsbygdsstrateg Luleå kommun*

During the spring, Luleå municipality's politicians held three citizen dialogues with village associations around the municipality. One for Sörbyarna, one for Mittbyarna/Skärgården and one for Norrbyarna in Råneå.

The municipality must develop a plan for municipal services in the countryside, and in order to create a common view of what services need to be available, Luleå's politicians wanted to get the views and needs of the village associations. In Råneå, about 40 people from the various villages in the Råneå and Vitå river valleys participated and the commitment was great.

Fredrik Hansson, municipal councilor, was satisfied and admitted that the dialogue with rural residents needs to be improved.

- This is a very important basis for us now that we have to draw up a plan for rural development. In order for it to be possible to live, work and live in rural areas, a maintained and developed service is an important issue for the municipality. It is also an important basis for giving people security and for promoting the desire to live and invest in rural areas.

Now the work begins to gather all opinions and for officials to develop a proposal for a plan for municipal service to the politicians. For more information and to be able to follow the process at work, please go to

GROW TOGETHER II - INFORMATION MEETINGS AND WORKSHOPS

In March, we sent out a letter to property owners of unoccupied properties in Råneå and Vitå-älvdalar, Boden and Luleå municipalities. The response we received was surprisingly positive! The majority have gotten in touch and said after receiving the letter that they have now decided to sell, even some to rent out their house. This is very gratifying because we got the response we wanted from the letter, namely to raise awareness, sow a small seed among these property owners. The idea is that more of these houses will come up for sale on the open housing market and that in turn contributes to more people being able to move into our villages.

At the end of May and the beginning of June, two information meetings and workshops were held. The theme was:

How do we create an attractive housing market in the Råneå and Vitå river valleys? We invited people, associations, companies and brokers. These days together created opportunities for more housing deals and increased permanent housing, as well as making life and people in the various villages visible.

Grow together II is a municipal progressing project between Boden and Luleå municipalities as well as Råek (Råne älvdalsrådet in Gunnarsby parish economic association) and the citizens' office Råneå.

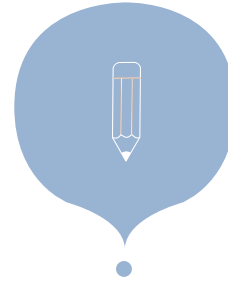

THE GOOD HOSPITALITY

Today, the hospitality industry and tourism is about so much more than providing good service. Since social change and the need for increased immigration throughout Boden municipality, the focus has shifted to being genuinely interested in visitors, including, attracting visitors and new Boden residents. We call that good hospitality. Therefore, it was easy to set the theme of the Hospitality Industry Day that was planned. We wanted to raise the perspective and gather people who represent every part of a society. When we experience things together, the effect can be both greater and stronger.

Said and now also done. On Thursday, April 27, we opened the doors at Folkets Hus in Gunnarsbyn to almost 100 participants in the seminar. There was a large representation from the hospitality industry the companies, other entrepreneurs, members of associations, officials from the municipality and some private individuals. We managed to attract professional Rickard Olsson as moderator. He did a great job of guiding us through the day.

The day offered lectures on the Gunnarsby model, Good hospitality, which was followed up with group work where everyone actively contributed with wise thoughts and reflections. There were many aha experiences, the feeling after the conference was very positive. Aurora safari provided coffee and food during the day in their temporary minicamp outside Folkets Hus. It feels like we started a thought in many people's minds that we believe will make a difference in how we meet new people in the future.

ÄLVSKOLAN, THE LITTLE VILLAGE SCHOOL WITH GREAT OPPORTUNITIES

The municipality of Boden invests in the Älvskolan and, happily, in the autumn we will have certified teachers on the school's teaching posts. The municipality makes salary investments for qualified people within the schools in the villages, and Älvskolan will cooperate with Harad's and Unbyn's schools.

We are also grateful for the collaboration that exists within the region and our hope is to be able to expand it. The village really cares about the school. We stand up for each other and the feeling is that people here in the village help each other. Please get in touch if you have suggestions on how we can collaborate.

We call that living countryside and neighbourhood life!

Streams and tributaries important for sea trout

TEXT *Sven Norman, ordförande Degerselsbygdens Samfällighetsförening*

Imagine 2 kaknäs towers stacked on top of each other. Vattenfall plans for a 416 square kilometer industrial area in the Råne river valley where they want to build 373 wind turbines with a height of 295 m each, in places only 1 km from the Råne river. The Degerselsbygden community association is strongly critical of the construction for several reasons.

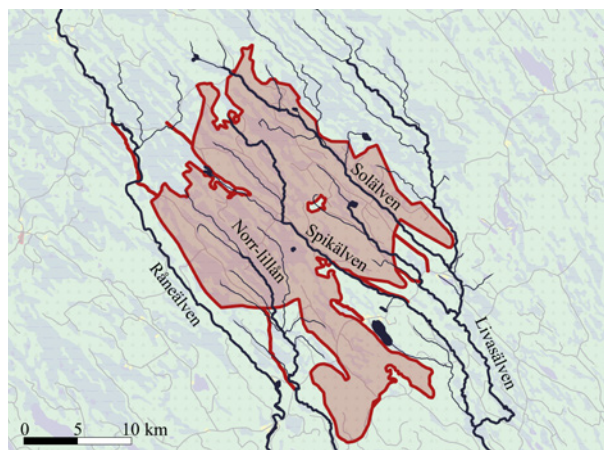

In this and future issues of JustNu, I will go through the impact that the industrial area would have on fishing, the fish and the landscape if it is allowed to be built. First up is the sea trout.

The trout, unlike the salmon, usually spawn in tributaries of the larger rivers. The young fish also live there for the first years of their lives before they migrate out to sea to grow up. In Råneälven, this concerns above all Abramsån, Norr-lillån, Spikälven and Solälven. The sea-migrating trout population in the Råneälven is strongly threatened, probably due to several factors, the most important of which are clearing of waterways, long-term floating of timber and dredging and fragmentation (division) of wetlands. The area where the industrial area is planned currently has a low degree of fragmentation and is therefore particularly important. The Solälven has recently undergone raft path restoration to improve the habitat for young trout and to create increased opportunities for trout spawning. In Abramsån, Spikälven and Norr-lillån, however, the need for raft joint restoration remains.

As the stock of sea trout in the Råneälven is at such low levels, it is important that the conditions for spawning and the habitat for the young trout are improved considerably - and above all not deteriorated. Roads that connect 373 wind turbines in the area

risk doing just this, as increased runoff on roadways and through road ditches inevitably leads to faster runoff in waterways. The effect on trout streams and larger tributaries is then an increased risk of low water flows and higher temperatures. This has a major negative impact on the watercourse's suitability for young trout. We are therefore very concerned about the proposed plans for a wind farm in the area.

Additional threats to these environments, directly dependent on the proposed industrial area, are the creation of artificial walking obstacles (road drums), turbidity and increased sedimentation of the watercourses during the construction process, turbidity and increased sedimentation of the watercourses due to heavy traffic on gravel roads after the construction process, and increased temperatures in the watercourses during fellings because the shady tree curtain disappears.
